Direction**

Versatility

Motivation

**Love
for Design**

FAVORITE PROJECTS/CLIENTS:

Quill / Branding and Consulting

A local startup, Quill Security Technology, asked for the full brand creation. I spent time getting to know their product, which aims to provide a matrix for large organizations to consistently monitor their security liabilities. Quill is a piece of technology that is sure to change the way businesses protect against digital, physical, and personnel risk.

Groundswell / Branding and Consulting

Groundswell is a staple in Saint Paul for great coffee, great bakery, and great atmosphere. I helped them paint their walls before they opened and created their brand. Since then we have worked on posters, merchandise, and creative consulting.

Pentair Spray IT Mobile App / Design

Our organization set out to help farmers spray their crops more safely and effectively. We created an app to help farmers test their sprayers right from their phone as well as select the proper chemical and nozzles. I created the design and user experience.

Moondog Gourmet Brats / Branding

Moondog Gourmet Brats was formed as a gourmet street food. We worked to create a fun brand and consumer experience.

N.R.R.C / Branding and Merch Design

Northside Residence and Redevelopment Council sought to create a new visual identity that conveyed the long-term dedication and service they provided to the Northside. I worked on the branding as well as consulting on their new website.

General Mills / Social Content Creation

I worked at General Mills on social content creation for various cereal brands. I art directed and designed their Holiday Chex Mix catalog, worked on branding and marketing for Cheerios' gluten-free campaign, and worked on marketing, design and photography for the return of French Toast Crunch.
